Primary 3 Science » Primary 3 Science (Term 4)

2 pts

For each question from 1 to 28 four options are given. One of them is the correct answer.

Study the pictures below.

Which characteristic of living things does it show?

- A) Living things die.
- B) Living things grow.
- C) Living things respond to changes respond them.
- D) Living things need air, water and food to stay alive.

2 pts

The table below shows the number of fishes in a fish tank over a period of four days.

Day	Number of fish
1	5
2	5
3	4
4	2

What are the likely reasons for the decrease in the number of fishes at the end of four days?

- A The fishes are not fed daily.
- B There is no air pump in the tank.
- C The fishes are swimming too slowly.
- D A disease has spread among the fishes.

- A) A and B only
- B) C and D only
- C) A, B and C only
- ✓ D) A, B and D only

2 pts

The picture below shows an apple.

Which one of the following statements correctly describes the apple?

	It is a fruit	It grows from a flowering plant	It need sunlight to make food	It gets water from the roots
(1)	Yes	No	Yes	No
(2)	No	No	Yes	Yes
(3)	Yes	Yes	No	Yes
(4)	No	Yes	No	No

- A) 1
- B) 2
- ✓ C) 3
- D) 4

2 pts

The table below shows the properties of materials, A, B and C.  
 A tick (✓) shows that the material has the property.

Properties	Materials		
	A	B	C
It bends easily.		✓	✓
It is waterproof.	✓	✓	
It allows most light to pass through.	✓		

Which of the following best represent materials A, B and C?

	A	B	C
(1)	glass	rubber	fabric
(2)	glass	fabric	rubber
(3)	rubber	glass	fabric
(4)	rubber	fabric	glass

- ✓ A) 1  
 B) 2  
 C) 3  
 D) 4

## Question 35

Primary 3 Science » Primary 3 Science (Term 4)

0 pts

(b) How do all the animals above reproduce?

[1]

---

(c) What is the difference between the body covering of the animals in Group S and Group T?

[1]

---

---

Question Type: Essay  
Date Added: Fri 29th May 2020  
Last Modified: Tue 14th Jul 2020  
QID#: 21,265,299

**Correctly answered feedback**

- b) They reproduce by laying eggs.**
- c) Animals in group S have a hard outer covering but animals in group T have dry skin covered with scales.**

**Incorrectly answered feedback**

- b) They reproduce by laying eggs.**
- c) Animals in group S have a hard outer covering but animals in group T have dry skin covered with scales.**

## Question 36

Primary 3 Science » Primary 3 Science (Term 4)

0 pts

2 The diagram below shows a leaf.

(a) Label the parts of the leaf, A, B and C in the boxes provided above. [1]

(b) Name two things that a plant needs to make food. [1]

---

---

(c) There are many tiny openings on the leaf. What is the function of these openings? [1]

---

---

Question Type: Essay  
 Date Added: Fri 29th May 2020  
 Last Modified: Tue 14th Jul 2020  
 QID#: 21,265,320

**Correctly answered feedback**

**a) A: leaf stalk    B: leaf blade    C: leaf vein**

**b) Sunlight/Water/Air**

**c) The tiny openings help plants take in and give out gases.  
 They allow the exchange of gases.**

**Incorrectly answered feedback**

**a) A: leaf stalk    B: leaf blade    C: leaf vein**

**b) Sunlight/Water/Air**

**c) The tiny openings help plants take in and give out gases.  
 They allow the exchange of gases.**

**Question 37**

Primary 3 Science » Primary 3 Science (Term 4)

0 pts

The diagrams below show plants X and Y.

plant X

plant Y

(a) What is the difference between the stems of plant X and plant Y? [1]

---

---

(b) Why does plant Y climb upwards on a support? [1]

---

---

(c) Besides supporting the plant, what is another important function of the stem? [1]

---

---

**Question Type:** Essay  
**Date Added:** Fri 29th May 2020  
**Last Modified:** Tue 14th Jul 2020  
**QID#:** 21,265,334

**Correctly answered feedback**

- a) Plant X has a strong stem but Plant Y has weak stem.
- b) To reach for more sunlight for photosynthesis/to make food.
- c) The stem helps to carry food and water to all parts of the plant.

**Incorrectly answered feedback**

- a) Plant X has a strong stem but Plant Y has weak stem.
- b) To reach for more sunlight for photosynthesis/to make food.
- c) The stem helps to carry food and water to all parts of the plant.

## Question 38

Primary 3 Science » Primary 3 Science (Term 4)

1 pt

The diagram below shows the human digestive system.

(a) Which organs, A, B, C, D, or E release digestive juices?

[1]

---

- ✓ A) A
- B) B
- ✓ C) C
- ✓ D) D
- E) E

**Question Type:** Multiple Response  
**Randomize Answers:** No  
**Grade style:** Full points if all answers are correct  
**Date Added:** Tue 14th Jul 2020

## Question 39

Primary 3 Science » Primary 3 Science (Term 4)

0 pts

(b) How does organ A help in digestion?

[1]

---

---

(c) What happens to the food when it enters organ C?

[1]

---

---

Question Type: Essay  
Date Added: Fri 29th May 2020  
Last Modified: Tue 14th Jul 2020  
QID#: 21,265,351

**Correctly answered feedback**

**b) In organ A, the mouth, food is chewed into smaller pieces and saliva makes the food soft to swallow.**

**c) In organ C, more digestive juice is added to the food to turn it into a soupy mix./ To break down the food further into simpler substances.**

**Incorrectly answered feedback**

**b) In organ A, the mouth, food is chewed into smaller pieces and saliva makes the food soft to swallow.**

**c) In organ C, more digestive juice is added to the food to turn it into a soupy mix./ To break down the food further into simpler substances.**

## Question 40

Primary 3 Science » Primary 3 Science (Term 4)

0 pts

Jamal conducted an experiment on four different types of materials to be used for making an anchor for a toy boat. An anchor is an object that is dropped into the water to stop the boat from moving away. The diagram below shows an anchor.

He placed the materials into a container filled with water as shown below.

(a) State the property of the material that Jamal is testing in his experiment. [1]

---

(b) Which of the following materials, A, B, C or D is most suitable for making the anchor? Explain why. [1]

---

(c) Is glass a suitable material for making an anchor? Give a reason for your answer. [1]

---

---

Question Type: Essay  
 Date Added: Fri 29th May 2020  
 Last Modified: Tue 14th Jul 2020  
 QID#: 21,265,368

**Correctly answered feedback**

a) Ability to float or sink/ Buoyancy of material.

b) Material C as it sank to the bottom of the water/sank completely (lowest/deepest/best) into the water.

c) No. Glass is fragile/breaks easily.

**Incorrectly answered feedback**

a) Ability to float or sink/ Buoyancy of material.

b) Material C as it sank to the bottom of the water/sank completely (lowest/deepest/best) into the water.

c) No. Glass is fragile/breaks easily.

## Question 41

Primary 3 Science » Primary 3 Science (Term 4)

0 pts

Alison set up an experiment as shown below to compare two different strips of materials, A and B. The materials are of the same thickness. She placed a plastic container with 100 ml of water on the strip as shown in the diagram below.

She measured the distance,  $d$ , which is the distance between the highest point and the lowest point of the strip.

The table below shows the results.

distance / cm	material A	material B
$d$	2	5

(a) Besides the same thickness, state another variable that must be kept the same for the strip in order for the experiment to be fair. [1]

---

---

(b) What could Alison conclude about Strip A and B from this experiment? [1]

---

---

(c) Explain your answer in (b) based on Alison's results. [1]

---

Question Type: Essay  
 Date Added: Fri 29th May 2020  
 Last Modified: Tue 14th Jul 2020  
 QID#: 21,265,385

### Correctly answered feedback

- The length of the strip.
- Strip B is more flexible than Strip A.
- Strip B is able to bend more than strip A (when the same amount of water was placed on the strip)

### Incorrectly answered feedback

- a) The length of the strip.
- b) Strip B is more flexible than Strip A.
- c) Strip B is able to bend more than strip A (when the same amount of water was placed on the strip)

## Question 42

Primary 3 Science » Primary 3 Science (Term 4)

1 pt

A factory uses a machine below to separate magnetic metals from non-magnetic metals. Both magnetic and non-magnetic metals are carried on the moving conveyor belt which is turned by wheel A and wheel B as shown in the diagram below

(a) In which wheel, A or B, is the magnet in the machine? [1]

---

- A) A
- ✓ B) B

**Question Type:** Multiple Choice

## Question 43

Primary 3 Science » Primary 3 Science (Term 4)

0 pts

(b) Containers C and D collect the metals. Describe how magnetic metals are separated and collected. [2]

---

---

(c) In which container, C or D, would copper be collected? Explain your answer. [1]

---

---

Question Type: Essay  
Date Added: Fri 29th May 2020  
Last Modified: Tue 14th Jul 2020  
QID#: 21,265,399

**Correctly answered feedback**

**b) Magnetic materials are attracted by B and collected by C. Non-magnetic metals are not attracted by B and fall into D.**

**c) Container D. Copper is not a magnetic metal, so it is not attracted by the magnetic wheel and falls off the belt into D.**

**Incorrectly answered feedback**

**b) Magnetic materials are attracted by B and collected by C. Non-magnetic metals are not attracted by B and fall into D.**

**c) Container D. Copper is not a magnetic metal, so it is not attracted by the magnetic wheel and falls off the belt into D.**

## Question 44

Primary 3 Science » Primary 3 Science (Term 4)

0 pts

The diagram below shows three discs, each with a hole at its centre. Two of the discs are magnets and one is made of rubber. All three discs can be slotted through the wooden stand.

Sulin drew a picture of an arrangement of the above discs in her notebook as shown below.

(a) Explain why one magnet is floating above the other. [1]

---

---

Sulin wants a new disc arrangement as shown below.

(b) Explain why the new arrangement is possible. [1]

---

---

Question Type: Essay  
 Date Added: Fri 29th May 2020  
 Last Modified: Tue 14th Jul 2020  
 QID#: 21,265,422

**Correctly answered feedback**

- a) Like poles of the 2 disc magnets are facing each other and they repel.
- b) Unlike poles are facing each other, so they attract.

**Incorrectly answered feedback**

- a) Like poles of the 2 disc magnets are facing each other and they repel.
- b) Unlike poles are facing each other, so they attract.

## Question 45

The diagram below shows an iron rod and a steel rod with wires coiled around each of them. The ends of the wires were connected to an electrical circuit. Both rods were placed a short distance above some clips.

(a) What happened to the iron rod and steel rod when the switch is closed? [1]

\_\_\_\_\_

The number of clips attracted by the iron rod and the steel rod are shown in the table below.

	First Try	Second Try	Third Try
Iron rod	12	14	13
Steel rod	7	6	8

(b) Why was the experiment repeated three times? [1]

\_\_\_\_\_

(c) Based on the results, which rod has stronger magnetic strength? Explain why. [1]

\_\_\_\_\_

\_\_\_\_\_

(d) What would happen to the results if the battery was removed from the set-up? Explain your answer. [2]

\_\_\_\_\_

Question Type: Essay  
 Date Added: Fri 29th May 2020  
 Last Modified: Tue 14th Jul 2020  
 QID#: 21,265,452

Correctly answered feedback

- a) Both became magnetized/temporary magnets/electromagnets.
- b) To ensure reliability of results./ Consistency of results.
- c) Iron rod has greater magnetic strength as it can attract more clips.
- d) Both rods will not be able to attract any clips as they cannot become electromagnets if there is no battery to allow electricity to flow through.

*Incorrectly answered feedback*

- a) Both became magnetized/temporary magnets/electromagnets.
- b) To ensure reliability of results./ Consistency of results.
- c) Iron rod has greater magnetic strength as it can attract more clips.
- d) Both rods will not be able to attract any clips as they cannot become electromagnets if there is no battery to allow electricity to flow through.
