Question 26

Primary 4 English » Primary 4 English (Term 2)

0 pts

Comprehension 1 (10m)

One cold night, Tess heard her parents talking about her little brother, Andrew. He was very sick and their father did not have enough money to send Andrew for an operation. She heard their mother say, "Only a miracle can cure him now!"

Tess went to her bedroom, emptied her savings from her piggy bank, 5 and walked swiftly to the pharmacy across the street.

"What do you want?" the pharmacist asked impatiently.

"I need a miracle that will save my brother," Tess answered, "he is very sick and my parents say only a miracle can save him. So, how much does a miracle cost?" "We don't sell miracles here, little girl. I'm sorry," the pharmacist 10 replied sadly.

A well-dressed man, who had overheard this, asked Tess, "How much are you willing to pay for this miracle, little girl?" Tess looked down at her hands, which contained only one dollar and eleven cents. "Well, what a coincidence," the man answered, "that is the exact price of a miracle for little brothers. Take me to 15 see your family. I might have the kind of miracle you need."

Dr. Armstrong, the well-dressed man, who was a surgeon, operated on Tess' brother and soon, Andrew was well. Dr Armstrong did not charge her parents a cent, and they could not thank him enough.

"I wonder how much the surgery would have cost us," Tess heard her 20 mother say to her father that day.

Tess smiled to herself. She knew she had helped save her brother's life, with a miracle.

Why did Tess' mother say that only a miracle could cure her little brother?

Question Type: Essay
Date Added: Wed 16th Sep 2020

Question 31

Primary 4 English » Primary 4 English (Term 2)

2 pts

Comprehension 2 (10m)

Have you ever heard the sound of a hummingbird? They make a buzzing noise when they fly. They make this noise when they beat their wings fast. Hummingbirds can beat their wings up to 80 times a second. All that beating makes a lot of noise, which gives them their name - hummingbirds.

Hummingbirds fly in a unique way. They move their wings so rapidly that they can hover. They can even hover or fly upside down. Hummingbirds are also the only birds that fly backwards. 5

Among the more than 9,000 species of birds in the world, the bee hummingbird is the smallest. They are just a little larger than bees and weigh less than a coin. Bee hummingbirds build tiny nests for their eggs. They use cobwebs, twigs and bits of tree bark, which they weave to build their nests. In some countries, people have found these tiny nests filled with pea-sized eggs on their clothes pegs! 10

Hummingbirds move fast. This means that they need to eat a lot. Their favourite food is nectar, a sweet liquid found in flowers. Hummingbirds consume more nectar daily than their own weight! They have to visit hundreds of flowers each day to get enough nectar to sustain themselves. Some of the nectar is conserved as energy in their bodies, to survive through the night. 15

Unlike other long-beaked birds, hummingbirds do not use their long beaks as straws to suck food into their mouths. They have a tongue just like us, which they use for eating. They flick their tongues in and out of their mouths while feeding on nectar. 20

Although small, they are able to adapt and survive among predators in their habitat.

Choose two statements which clearly describes a hummingbird.

- ✓ A) can fly backwards
- ✓ B) eats nectar
- C) has a long tongue
- D) uses only tree bark to build its nests
