Section H: Comprehension (Selected Response) (5 marks)

Princess Vela of France was born deaf in 1865. She learned to lip-read at a young age and could speak several languages. She later married Prince Carlos and moved to Hungary. They had three children and she communicated with them in sign language. Despite being disabled, Princess Vela was not discouraged. Instead, she served God by helping people because she 5 believed that it was God's purpose for her to do good works.

Over the years, Hungary had suffered much through several wars which brought hardship to her people and to the royal family. Still, Princess Vela did many charitable works and helped the poor. Unfortunately, her husband left her and she had a nervous breakdown. Immediately, she was sent to a mental 10 hospital against her will. She did not even get a chance to say goodbye to her children. Her youngest son, six-year-old Raymond, was devastated when he returned from a carnival and found his mother gone.

After she was discharged from the mental hospital, she worked with the Treta which was an organisation that provided food and shelter for orphaned 15 children.

Princess Vela died in 1969 with no possessions as she had so generously given everything she had to the poor. To this day, she is remembered as a kind woman who lived out her faith through her good works. 19

According to the first paragraph, Princess Vela communicated with her children in sign language because ____

- A) they were poor
- B) she was a princess
- C) it was her mission in life
- ✓ D) she was born deaf

Section I: Comprehension (Open-Ended) (10 marks)

Daniel was a bright and well-behaved boy. His parents wanted to give him the best that life could offer. They worked very hard to provide for him, often returning home late at night while his grandfather looked after him.

When Daniel was six years old, his grandfather suddenly passed away. *With* no one else left to look after Daniel, his mother stopped working to take care of him. His mother cooked for him, cleaned up after him and took him to his enrichment classes. She doted on him so much that she even bought him a Nintendo Switch so he could enjoy playing digital games. Soon, Daniel's mother realized that she was able to complete her household chores without interruptions from Daniel because the Nintendo Switch kept him so occupied. 10

By the time he was eight years old, Daniel was spending more than eight hours a day on his Nintendo Switch. He became so engrossed in digital games that he lost interest in all the other activities while refusing to do his homework. Consequently, he did badly in school.

Daniel's parents knew that they had to do something to help him. They 15 decided to take away his Nintendo Switch. Daniel reacted badly to the confiscation. He was easily irritated, and his parents could not calm him down. He also became moody and could not pay attention in school. Over time, his behavior started to deteriorate. Things became so bad that his parents took him to see Doctor Jeremy who was well-known for treating addiction among children. He explained 20

to Daniel's parents that too much screen time would damage a young child's developing brain and it is irreversible.

Daniel's brain had been so badly affected that he had become a "digital addict". His parents were devastated. Daniel had to be enrolled in Doctor Jeremy's counselling programme for six months to help him manage his addiction. 25

Why did Daniel's parents often return home late at night?
